

**COLIBRI
TECHNICS**

CTL 1700M

**Semi-automatic laminator
with heating up to 60°C**

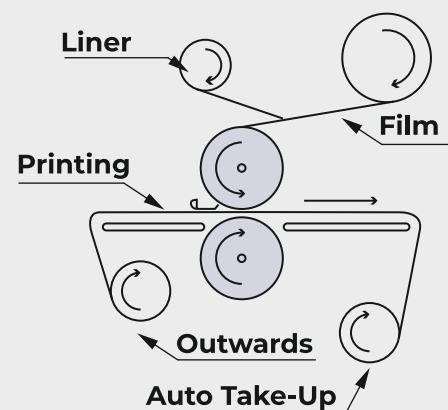

INDUSTRIAL MODEL

Classic model with warm lamination

- Perfect Laminating Quality with Stronger Roller Pressure
- Laminating & cutting with max speed of 12m/min
- Hot and cold lamination
- Manual nip-gap and pressure adjustment
- 130mm diameter silicon rollers for heavy duty work
- Auto-locked exchangeable roll shafts
- Ideal fit for mounting & laminating pressure-sensitive graphics
- Ergonomic control panel
- Long life-span of laminating roller
- Laminating width of 1630mm to handle various ranges of substrate & media
- Adjustable speed settings
- Footswitch for convenient operation on every side of laminator

Max lamination width	1630mm/64"
Max lamination thickness	28mm/1.1"
Max temp	60°C
Warm up time	5-10 min
Heating	Infrared
Up and down	Hand crank
Max speed	12m/min
Power consumption	0.5-0.8 kw/h
Power input	1400w
Volt	110/220v
Net weight	195kg

With Liner
